

Table of Contents

Preface.....	I
Acknowledgement	V
Table of Contents	VII
List of Figures.....	XI
List of Tables.....	XIII
List of Abbreviations.....	XV
1 Introduction.....	1
1.1 Motivation and Problem Statement	1
1.2 Research Objective.....	7
1.3 Research Design	10
1.4 Thesis Structure.....	13
2 Introduction to Road Freight Transport	15
2.1 Road Freight Transport	15
2.1.1 Context and Definition of Road Freight Transport	15
2.1.2 Roles within the Road Freight Transport Industry.....	22
2.1.3 Current Challenges of the Road Freight Transport Industry	26
2.1.4 Road Freight Transport Planning	29
2.1.5 Digitalization of Road Freight Transport Planning.....	33
2.2 Scope of the Thesis	36
3 Research Approach.....	39
3.1 Structured Literature Review	39
3.2 Multi-vocal Literature Review.....	42
3.3 Semi-structured Interviews.....	46
3.4 Integration of Methods in the Design Science Framework	50
4 Development of a Process Reference Model for Operational and Real-Time Planning	53
4.1 Terminology and Goals of Process Reference Models	53
4.2 Requirements for the developed Process Reference Model.....	55
4.3 State of the Art – Depiction of operational and real-time transport planning in existing models	56
4.3.1 Method.....	56

4.3.2	Operational and Real-Time Transport Planning in Supply Chain Reference Models	59
4.3.3	Logistic and Transport Management Models	64
4.4	Method for Developing the Process Reference Model	69
4.5	A Process Reference Model for Operational and Real-Time Transport Planning in Road Freight Transport	72
4.5.1	Structure of the Process Reference Model.....	72
4.5.2	Layer 1 - Process Overview	75
4.5.3	Layer 2 - Prepare Transport Order	77
4.5.4	Layer 2 - Plan Load	80
4.5.5	Layer 2 - Assign Load.....	82
4.5.6	Layer 2 - Plan Tour	84
4.5.7	Layer 2 - Handle Exception	86
4.6	Identification of Decision Tasks	88
4.7	Evaluation.....	89
4.7.1	Requirements Evaluation.....	90
4.7.2	Interview-based Evaluation	93
4.8	Limitations and Outlook.....	94
5	Machine Learning for Road Freight Transport	97
5.1	Introduction to Machine Learning	97
5.1.1	Terminology and Definitions.....	97
5.1.2	Overview of Learning Paradigms and Task Categories.....	99
5.1.3	Frequently used Machine Learning Algorithms.....	102
5.2	State of the Art: Machine Learning for Road Freight Transport.....	109
5.2.1	Method.....	109
5.2.2	Machine Learning Applications in Road Freight Transport Planning	111
5.2.3	Current Research Gaps and Scope of the Thesis	115
6	Identification of Decision Tasks suitable for Machine Learning.....	119
6.1	Goal and Requirements of the Suitability Assessment Approach	119
6.2	Characteristics of ML-addressable Problems.....	121
6.2.1	Method for defining the Problem Characteristics	121
6.2.2	Strong Characteristics	125
6.2.3	Soft Characteristics	131
6.3	Question-based Machine Learning Suitability Assessment	135
6.3.1	Method for Development and Structure of Assessment Questions	136

6.3.2	Assessment Questions and Explanatory Statements	142
6.3.3	Assessment of Decision Tasks in Operational and Real-time Transport Planning.....	146
6.4	Evaluation.....	150
6.4.1	Requirements Evaluation.....	150
6.4.2	Interview-based Evaluation	152
6.5	Limitations and Outlook.....	154
7	Design of an Implementation Guideline.....	157
7.1	Goal and Requirements of the Implementation Guideline	157
7.2	Method for Developing the ML Implementation Guideline	159
7.3	State of the Art – Implementation Guidelines for using Machine Learning.....	164
7.4	A Three-Cycle Machine Learning Implementation Guideline for Road Freight Transport Planning.....	170
7.4.1	Structure of the Implementation Guideline	170
7.4.2	Supporting Functions	172
7.4.3	Exploration Cycle.....	176
7.4.4	Experiment Cycle	181
7.4.5	Operation Cycle.....	202
7.5	Evaluation.....	206
7.5.1	Requirements Evaluation.....	206
7.5.2	Interview-based Evaluation	209
7.6	Limitations and Outlook.....	211
8	Case-based Evaluation.....	213
8.1	Overview of Evaluation Approach and Use Cases	213
8.2	Case A: Price Estimation.....	215
8.2.1	Problem Statement and Positioning in the Process Reference Model	216
8.2.2	Applying the Implementation Guideline.....	217
8.2.3	Discussion of Evaluation Dimensions.....	222
8.3	Case B: Freight Prediction	223
8.3.1	Problem Statement and Positioning in the Process Reference Model	223
8.3.2	Applying the Implementation Guideline.....	224
8.3.3	Discussion of Evaluation Dimensions.....	230
8.4	Case C: Pattern Recognition.....	231
8.4.1	Problem Statement and Positioning in the Process Reference Model	231
8.4.2	Applying the Implementation Guideline.....	233

Table of Contents

8.4.3 Discussion of Evaluation Dimensions.....	238
8.5 Discussion of Insights and Limitations	239
9 Conclusion	244
9.1 Summary	244
9.2 Limitations.....	248
9.3 Outlook.....	250
References.....	253
Appendix.....	279
A Process Reference Model for Operational and Real-Time Transport Planning...279	
A.1 Glossary	279
A.2 Complete Process Reference Model.....	282
A.3 Overview of used BPMN elements	290
A.4 Development Interview Guideline	292
A.5 Evaluation Interview Guideline	294
A.6 Evaluation Interviews Summary.....	295
B Suitability Assessment.....	297
B.1 Assessment Questions and Explanatory Statements.....	297
B.2 Assessment of Strong Characteristics	301
B.3 Evaluation Interview Guideline	305
B.4 Evaluation Interview Summary	306
C Implementation Guideline	313
C.1 Sources for Experiment Cycle.....	313
C.2 Strengths and Weaknesses of ML Algorithm Classes.....	318
C.3 Evaluation Interview Guideline	320
C.4 Evaluation Interview Summary	321
D Case-based Evaluation	327
D.1 Assessment of Strong Characteristics.....	327
D.2 Assessment of Soft Characteristics	328
